

School of Engineering

[Summer Undergraduate Research Fellowship program \(SURF\)](#)

- Aims to build community, explore identity formation, and create a cohort of future graduate student engineers who can promote diversity within the engineering and science student body
- 8-week program that brings approximately 30 undergraduates from across the country to Stanford for an immersive research and graduate school preparation experience

PhD Admissions

- Increased outreach to Minority Serving Institutions
- Increased investment in programs to bring URM and Under-resourced students to Stanford prior to admissions
- We believe summer 2020 engagements should help build applicant pool for 2021
