

Pronoun Data

To support an inclusive and respectful community, Stanford University invites you to indicate which pronouns should be used in campus interactions to address you.

Selecting pronouns is **optional**.

Who will see my pronoun data?

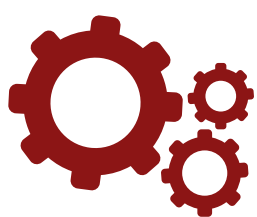

When you save your pronouns in Axxess you give permission for your pronouns to be used by Stanford systems to be shared within the University community (e.g., on class rosters and StanfordWho). Pronoun data may appear in additional campus systems as use is extended. Please do not assume that every campus system will receive your pronouns as Stanford's technical eco-system is highly decentralized.

My pronoun data will be:

Displayed on class rosters and in Canvas so my instructors and classmates know how I should be addressed (*Autumn 2022*)

Displayed in additional campus systems as use is extended (e.g., StanfordWho, housing and advising systems)

My pronoun data will **not** be:

Used to identify me personally in institutional reporting

Used to make decisions about my eligibility for campus programs and resources

Released to third parties without my explicit consent
